Aluminum Standard Track

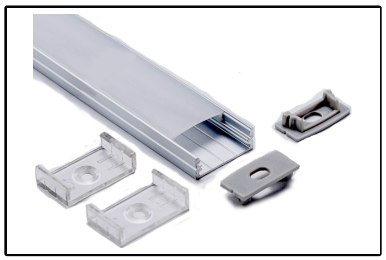

Standard / Corner / Recessed

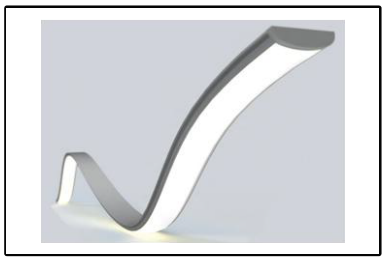

D21AL06 / AL18 / AL08 / AL10 / AL05

Product Overview

Take your lighting installation to the next level with Design 21's aluminum LED track. Designed for durability and versatility, this sturdy track helps protect and secure various LED tape light installations. The aluminum construction is lightweight and functions as a simple heat sink, helping to dissipate heat during operation and extend the life of the LEDs. Suitable for residential, commercial, and architectural projects.

Wide Surface
